## East Lothian Council selects **framework** for Children's and Adults' Social Care Services

Corelogic is extremely pleased to announce that East Lothian Council has followed other Scottish Councils – Scottish Borders, Midlothian and Dumfries & Galloway – in selecting **framework** to support case management and financial management and control for both Children's and Adults' Services, together with Criminal Justice. This means that Corelogic has now won the last three OJEC tenders in Scotland which is simply an outstanding achievement! We fully expect to win many, many more.

**framework** was selected by East Lothian to replace its legacy OLM CareFirst social work system across all of the three core services. East Lothian was particularly keen to ensure that it selected a system that was both highly usable and demonstrably met the needs of both front line social workers and managers alike. As part of the evaluation process, representatives from East Lothian Council visited both Scottish Borders Council and Midlothian Council, both of whom have recently enjoyed considerable success with their implementation of **framework**.

East Lothian has developed a highly respected strategy for the delivery of services to a diverse range of people from all walks of life. Teams work with individuals and families, and their carers, to provide comprehensive tailored packages of support. The standard of social work was recognised by an individual award at this year's British Association of Social Workers (BASW) Awards Ceremony, established to recognise the very best in front line social work practice.

East Lothian Council plans to implement both **framework** Case Management and Finance functionality simultaneously during 2010, and will then look toward full integration with its internal systems. By choosing **framework** East Lothian will also be able to achieve significant benefits from integration with the National eCare messaging framework, for publication of forms and Child Protection messaging, and will have a platform for integrated collaborative working with their neighbour authorities, together with profiting from the sharing of best practice processes and configuration with those authorities.

Gill Smith, Corelogic's Managing Director, commented: "To have another Council in Scotland select **framework** to be the centre of social work case and financial management recording is a great achievement and demonstrates that Corelogic is now really 'on the map' in Scotland. We are delighted that East Lothian has joined our existing Scottish customers – all of whom can be assured that as the social work agenda around self-directed support and GIRFEC develops in Scotland, **framework** will continue to meet these changing needs."

## About Corelogic

- Corelogic aims to deliver software products that people want to use - that genuinely help and add real value to the challenge of delivering a consistently high quality of care. We believe that by applying appropriate technology innovatively we can make a real difference to the challenge of delivering ever higher standards of care.
- Corelogic has experienced rapid and consistent year-on-year growth since its inception and as a result of this success can attract the best talent in the industry and reinvest significantly in further development of the company and product. We have offices in London and Edinburgh, and as well as being focused on our core UK social and health markets have plans to expand globally.
- Corelogic is very proud of its strong customer relationship management ethos, which has resulted in true partnerships being implemented which customers actually value, and a long-term, loyal and positive Corelogic customer base. References will happily attest to this fact.

## About our solution – **frameworki**

- We are proud to have built the above ethos into **frameworki**, our fully browser-enabled Java solution. **frameworki** is a workflow based case management system and finance system that offers an unrivalled strategic solution for Adult Social Care and Children's Services, as well as the NHS. It offers a complete end-to-end solution, from initial contact, through assessment and care planning, to commissioning and payments. It fully supports multi-agency working and integration with national systems including ContactPoint, eCare and the NHS Spine.
- **frameworki** is aimed at case workers, enabling them to record and share accurate and relevant information in a timely manner with other professionals. Our design is based upon the premise that if caseworkers find it helpful they will use it, resulting in the capture of quality data from which more informed judgments can be made.
- **frameworki** is the only e-social care solution that has met **all** the business critical e-Government targets for local authorities within the timescales laid down by Scottish Government and other agencies – including the Department for Children, Schools and Families (DCSF) and Department of Health (DH) – in one integrated, end-to-end, flexible and configurable, future-proofed solution.
- In Scotland **frameworki** will support eCARE integration, the Single Shared Assessment (SSA), Getting it Right for Every Child (GIRFEC) and all Scottish Statutory reporting requirements, both now and in the future.
